

Bruce Bridgeman Memorial Symposium

Friday, May 19, 2017, 9:00 – 11:30 Pavilion

Organizer: Susana Martinez-Conde, State University of New York

Speakers: Stephen L. Macknik, Stanley A. Klein, Susana Martinez-Conde, Paul Dassonville, Cathy Reed, and Laura Thomas

Professor Emeritus of Psychology Bruce Bridgeman was tragically killed on July 10, 2016, after being struck by a bus in Taipei, Taiwan. Those who knew Bruce will remember him for his sharp intellect, genuine sense of humor, intellectual curiosity, thoughtful mentorship, gentle personality, musical talent, and committed peace, social justice, and environmental activism. This symposium will highlight some of Bruce's many important contributions to perception and cognition, which included spatial vision, perception/action interactions, and the functions and neural basis of consciousness.
